Apprentice Engineer – NEC Corporation India Pvt. Ltd.

Feb 2026 – Present | Bengaluru, India

Working on **PAX A920 Android-based POS terminals** for public transportation ticketing solutions, integrating **NFC smart cards (MIFARE DESFire)** and **SAM card-based secure authentication** for reliable and secure transactions. Developing and testing Android applications for **bus and metro ticketing workflows**, focusing on payment processing, card communication, device integration, and secure data handling using Java Language and Android Studio.

Education

Bachelor of Technology (B.Tech) – Computer Science and Engineering (AI/ML), 2022-2026

Alliance University, Bengaluru CGPA: 7.4

12th Grade (CBSE), Valley View School, Jamshedpur 2021-2022
69.4%

10th Grade (CBSE), Valley View School, Jamshedpur 2019-2020
62%

Technical Skills

Programming Languages

C++, Python, Java

Machine Learning

TensorFlow, Keras, NLP, Exploratory Data Analysis, ANN, Decision Tree

Coursework

Data Structures, Algorithms, OOPs, Operating Systems, DBMS, Computer Networks, MLOps

Web/App Technologies

HTML, CSS, JavaScript, React.js, React Native, Node.js, Express.js, Spring Boot, SQL

Tools & Platforms

Git, GitHub, Docker, Kubernetes, VS Code, Jupyter Notebook, GitHub Action, Google Colab, Microsoft Azure

Achievements & Participation

Participant, Ideathon'22 @ Alliance, Hackathon organized by the Dept. of CSE-IT, Alliance University

4 Java Coder on Hacker Rank

Academic Projects

AU Exam App & Web (<https://auexamapp.tech/>)

Developed a full-stack mobile app and website for uploading and managing academic papers using React Native, React.js, Node.js, Express.js, Vite Native Wind, Tailwind CSS, expo, PostgreSQL. Implemented secure file upload, user authentication, and AI assistance to real-time response streaming. And CI/CD with GitHub Action for building apk and Docker image.

AI Restaurant Name & Menu Generator (<https://ai-booking-assistant.streamlit.app/>)

Engineered an AI-powered tool leveraging Python, GPT models, Lang chain and Azure OpenAI to generate 75+ creative restaurant names and authentic menu items, improving workflow and reducing market research time by 10 hours. Stream lit web app that generates a creative restaurant name and a list of authentic menu items based on a selected cuisine.

Cardiovascular Risk Prediction System (<https://cardiovascular-risk-prediction.hansrajvvs.me/>)

Developed an end-to-end machine learning application using FastAPI to predict cardiovascular disease risk using a trained Random Forest model with MLflow-based experiment tracking. Implemented preprocessing pipelines with label encoding and scaling, containerized the application using Docker, and deployed it on Railway with production-ready CORS handling and RESTful API endpoints.

Tech Stack: Python, FastAPI, Scikit-learn, Pandas, Docker, Railway, MLflow, Joblib, DVC (CI/CD with GitHub Action), HTML, CSS, JavaScript

Certifications

**Oracle Cloud Infrastructure
2025 Certified Generative AI**

**Compiler Design
– NPTEL (2025)**

**Meta Front-End Developer
Certification – Meta (2025)**
